

## EARN 40 CATEGORY 1 AND CPR POINTS FROM THE RACGP IN 1 DAY!

The Advanced Life Support Course will deliver Doctors, Nurses and Paramedics valuable skills and knowledge while providing continuing professional development points. The program is recognised by a number of colleges including RACGP, ANZCA, CICM, ACRRM, CAN, ACEM and RACP.

We conduct ALS Level 1 and Level 2 courses in Adelaide, Brisbane, Canberra, Melbourne, Perth and Sydney with over eight courses conducted every month.

Visit [www.advancedlifesupport.com.au](http://www.advancedlifesupport.com.au) to find a date and location that suits you. Bookings and payments are taken online so enrolling in our courses is very easy.

We use only the latest and best simulation equipment to make the course interactive and immersive. Our award winning simulation monitor defibrillator the ALSi provides an economical, highly advanced realistic patient condition simulation package which can act as a fully featured multi-parameter monitor, AED and defibrillator.

**Have a group of 6? We can come to you!**

## ADVANCED LIFE SUPPORT COURSES

Approved by the Australian Resuscitation Council

The advanced life support (ALS) course teaches the theory and practical skills to effectively treat cardiorespiratory arrest, peri-arrest situations and special circumstances and to prepare members of a team to treat the patient until transfer to a critical care area is possible.

ALS level 1 is suitable for medical staff as part of a team providing management to the patient in the immediate period of crisis. It includes the recognition, assessment and immediate management of the deteriorating patient and skills for dealing with a cardiac arrest or other medical emergencies in a clinical setting. Included in the course is:

- + Recognition, assessment and management of the critically ill patient using a structured ABCDE approach.
- + Airway management skills.
- + Basic Life Support.
- + Defibrillation skills (Manual and/or AED modes).
- + Cardiac arrest management using the ARC ALS Algorithm.
- + Work as an effective team member in a cardiac arrest.

ALS level 2 is suitable for all medical staff who wish to improve their technical understanding of the procedures used in managing cardiac arrest and the dynamics of a critical care team. In addition to the elements covered in the ALS 1 course, teaches the knowledge and skills required to:

- + Treat cardiac and/or respiratory arrest, including manual defibrillation.
- + Cardiac arrest management using the ARC ALS Algorithm.
- + Preparing and planning for post resuscitation care.
- + Care for the deteriorating patient or patient in cardiac arrest and/or respiratory arrest in special circumstances such as asthma, anaphylaxis, and pregnancy.
- + Lead a team, work as a team member, and use structured communication skills including giving an effective handover.
